18 November 2020

Dear Parents / Guardians,

Marist College North Shore has entered into a trial with Atomi, one of Australia's leading online teaching & learning platforms. This trial will provide our students with a library of thousands of videos & questions specifically tailored to the HSC curriculum.

Staff & students will use the platform to access 1000s of syllabus-aligned videos, retrieval quizzes, and practise exam-style questions. Staff can assign tasks, ensure that students are regularly revising their work, and track student progress over time.

For students in particular, Atomi provides the following benefits:

- **Unlimited access:** Students will receive complete access to videos, quizzes, and exam-style questions through Y11&12.
- **Personalised revision:** With the help of Atomi AI, students receive personalised feedback and revision reminders, helping them manage their study habits and review content at spaced intervals
- **Increased support:** Atomi is available 24/7 on all devices

Upon accepting Atomi's email invitation to access the online material, your child will automatically be placed into the classes that they are studying in Y12. Your child will then be able to access all the content for their courses to support their study.

If you would like to find out more about Atomi, you can visit their website at <https://getatomi.com/au>. They also have a live chat function in the bottom right corner of the screen if your child needs assistance whilst on the site. Alternatively, you can speak to myself should you have any further questions.

Our hope is to understand whether Atomi is beneficial to your child as they commence their HSC studies.

Yours sincerely,

Tracey Dunne
Academic Resource Leader
